Hypoallergenic	No	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Resizable	Yes	Yes	No	Yes	Yes	Yes	Yes	Yes
Description	<p>Yellow gold is timeless and elegant, so your selected design will never go out of style. Yellow, white, and rose gold are the three gold hues offered by Luxe to fit your perfect design. You can add tantalum or zirconium features to your ring to give it a distinctive appearance.</p>	<p>Strong and rare blue-gray metal for a modern, manly ring. It complements other metals beautifully, especially rose gold, yellow gold, and two-tone designs.</p>	<p>Beautiful lightweight rings that won't dent or crack but cannot be resized. It gives your Luxe's designs an edge with a silver-gray color that is deeper than platinum or silver.</p>	<p>Extremely rare and durable metal. Purely hypoallergenic with a bright, lustrous finish. Platinum is twice as hard as other metals, making platinum rings strong and long-lasting. If you want a low maintenance metal or high value and dazzling finish, Platinum is the ideal choice.</p>	<p>Dark black style metal strong as titanium, hypoallergenic, and easy to wear. Zirconium looks stunning when used with either white or black diamonds for a subtle dazzle.</p>	<p>For added strength and sparkle, Luxe uses sterling silver for all of its silver rings. It has a white glossy shine that complements gemstones beautifully. However, sterling silver needs a little more maintenance since it can tarnish over time.</p>	<p>Strong, durable, and lightweight metal.</p>	<p>Natural white glowing sheen is a distinct feature of Palladium.</p>
